GameFi Whitepaper

Project Information

Maximum Supply:	100,000,000 TOU
Total Supply:	100,000,000 TOU
Network:	BNB Smart Chain
Type:	Web3 Gaming + Play-to-Earn
Date:	November 2026

https://toutougame.com

Contract: 0x61227b69eB135eD6e5C556968C9631ed0E0b66A8

1. Vision

TOU is a Web3 gaming token for a next-generation blockchain gaming ecosystem. The project creates a sustainable play-to-earn economy where players earn real value through gameplay while supporting the development of innovative blockchain games.

Our team believes in the potential of digital assets and blockchain technology. We are committed to building a gaming platform where players own their progress and rewards.

> **Mission:** Create a fair, transparent, and rewarding gaming ecosystem where community members benefit from the game's success.

2. TOU Token

Token Details

Property	Details
Name	Toutou (TOU)
Network	BNB Smart Chain (BSC)
Total Supply	100,000,000 TOU
Contract Address	0x61227b69eB135eD6e5C556968C9631ed0E0b66A8
Standard	BEP-20 / ERC-20
Decimals	18

Token Economics

- **Fixed Supply:** Maximum supply of 100 million tokens
- **No Additional Minting:** No new tokens can be created beyond the initial supply
- **Deflationary:** Token burning mechanism reduces supply over time
- **Sustainable:** Fixed supply ensures long-term scarcity and value preservation

3.Token Distribution

Initial Allocation

Category	Allocation	Purpose
Players & Community	85% (85M TOU)	Play-to-earn rewards, staking, community incentives
Development Team	15% (15M TOU)	Development, operations, long-term commitment

Team Commitment

✓ The development team will NOT sell tokens

- Team tokens are for internal use only
- Tokens enter ecosystem as stake in project success
- Team benefits from long-term token appreciation
- No conflict of interest; team is invested in success

4. Gaming Ecosystem

Core Features

- **Web3 Gaming Platform:** Next-generation gaming experience on blockchain
- **Play-to-Earn:** Players earn TOU rewards through gameplay
- **Player Ownership:** Players truly own their in-game assets and rewards
- **Transparent Economy:** All transactions recorded on blockchain

Play-to-Earn Model

- **Weekly Leaderboards:** Top players compete for rewards
- **Consistent Rewards:** Regular earnings based on participation and skill
- **Anti-Cheat System:** Fair competition protected by anti-cheating measures
- **Sustainable Rewards:** Rewards funded from token ecosystem

5. Staking & Rewards

Staking Program

- **Flexible Periods:** Lock tokens for 30, 60, 90, or 365 days
- **Principal Return:** 100% return of staked tokens after lock period
- **Passive Income:** Rewards earned for supporting the network
- **No Lock-in:** Choose your lock period based on preference

Burning Mechanism

The token includes a deflationary burning system that reduces total supply over time. This creates scarcity and supports long-term value appreciation.

- Tokens can be permanently burned by holders
- Burning reduces total supply
- Deflationary model supports token value

6. Technology & Security

Smart Contract

- **Blockchain:** BNB Smart Chain (industry standard, secure, proven)
- **Standard:** BEP-20 / ERC-20 (compatible with all major exchanges and wallets)
- **Transparent:** Contract code verified on BscScan
- **Upgradeable:** Can be improved while maintaining security

Verification

- Contract source code verified on BscScan
- All transactions transparent and auditable
- Community can verify contract behavior
